Professional Summary

Frontend Developer with hands-on experience in React.js, Next.js, TypeScript, and Tailwind CSS, currently expanding into backend development with Node.js, Express.js, and PostgreSQL. Skilled at building scalable, performant, and user-friendly web applications. Proven track record delivering production features, integrating GraphQL and REST APIs, and working across engineering, QA, and design teams to ship high-quality products.

Technical Skills

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js

State Management: Context API, Zustand, React Query

API Integration: REST API, GraphQL

Database: PostgreSQL

Deployment: Vercel, Railway

Tools: Git, Figma, Vite, Jira

Design: UI/UX Design, Wireframing, Prototyping, Responsive Design

Work Experience

Junior Software Engineer — Ninjas Code

Nov 2025 – Present

- Debugged and maintained Enatega, a production-level multivendor food delivery platform built with Next.js and TypeScript, ensuring stability and reliability across core features.
- Built responsive UI screens for the Lumi Foods Super App and integrated backend REST APIs end-to-end, enabling smooth data flow between frontend and server.
- Maintained and optimized GraphQL APIs to improve data-fetching efficiency and ensure consistent, structured responses across platform features.
- Refactored UI components to improve visual consistency, usability, and overall application performance across the platform.
- Collaborated with QA, backend, and design teams to ensure timely and reliable feature delivery across all sprint milestones.

Web Developer (WordPress) — JK Media Digital Marketing

Feb 2025 – Sept 2025

- Built and customized client websites using WordPress, Elementor, and Elementor Pro with targeted CSS, delivering responsive and visually consistent designs.
- Configured plugins and ensured cross-device compatibility and responsiveness across all client deliverables.
- Managed client revision cycles via Jira, coordinating with QA and content teams to meet deadlines and maintain delivery quality.

Projects

FixRight — Admin Panel

Professional

Technologies: Next.js, TypeScript, Tailwind CSS, ShadCN, React Query, Zustand, REST API

- Designed and developed the complete admin panel UI from scratch, translating Figma designs into clean, functional interfaces.
- Integrated REST APIs in collaboration with the backend team, ensuring seamless data flow across all admin modules.
- Conducted systematic testing and debugging across the platform, identifying and resolving inconsistencies prior to production release.
- Diagnosed a critical coupon module bug where newly created coupons incorrectly entered an expired state; coordinated with the backend team to redesign the status logic and fully resolve the issue.

Lumi Foods — Super App Platform

Professional

Technologies: Next.js, TypeScript, Tailwind CSS, ShadCN, Context API, React Query, Zustand, REST API

- Built scalable, reusable UI components using Next.js and TypeScript, achieving pixel-perfect implementation across all breakpoints.
- Integrated REST APIs and managed application-wide state via Context API and Zustand, ensuring consistent and efficient data handling.
- Tested and optimized features for performance, responsiveness, and user experience across devices.

Enatega — Multivendor Food Delivery Platform

Professional

Technologies: Next.js, TypeScript, Tailwind CSS, ShadCN, Context API, GraphQL

- Resolved production-level bugs and delivered new features following scalable, maintainable architecture patterns.
- Integrated GraphQL APIs for structured data fetching and improved UI consistency across components using Tailwind CSS and ShadCN.
- Partnered with QA teams to validate feature releases and ensure stable, regression-free deployments.

UroVision — Kidney Stone Detection System

Final Year Project

Technologies: React.js, Tailwind CSS, Firebase, React Native, Express.js, MongoDB, Figma

- Designed end-to-end UI/UX for web and mobile in Figma and built the complete web frontend using React.js and Tailwind CSS.
- Developed the authentication backend using Node.js, Express.js, and MongoDB, and engineered login and dashboard screens in React Native for secure multi-platform access.

Education

Bachelor of Software Engineering

2021 – 2025

National University of Modern Languages | CGPA: 3.77 / 4.0
